Small Dainage.

(Special to The Tinges-Dispatch.)

BLACKSBURG, VA. Jun. 21.—Fire was discovered last alght by the night watchman in the faculty apartment of the dlaing hall, but the flames were quickly extinguished by using a Rx fire extinguisher. The fire was caused by an oil stove which was used to heat the coffee. Steward Shuitz's theory is that the water, which was just above the oil oll stove which was used to heat the coffee. Steward Shultz's theory is that the water, which was just above the oll to keep the oll cool, had all evaporated the oil had become heated and the gas given off caught fire and made the blaze. Very little damage was done further than burning a hole in the wainsconting, damaging one end of the sideburd and smoking the celling. As picture of three fish which was hanging over the coffee urn was roasted. With the present fire-fighting equipment, it is practically impossible for a fire to get any headway in the dining hall hands and the "fat friers" understand the manipulation of them thoroughly. Recent additions of hose and rees, ladders and other fire-fighting and life-saving equipment make the V. P. I. fire department up to date in every way and capable of meeting any emergency that maw arise. "The fire drills with the new apparatus have been more frequent and satisfactory this year than ever before.
